  - Within the United States, report any missing or damaged parts to SYSTIMAX Customer Service in Omaha, NE, at 1-866-539-2795. Outside the United States, contact your local account representative or Authorized BusinessPartner.

Procedure

1. Slip a 2-inch (51 mm) length of tubing over the previously installed white polyvinyl chloride (PVC) tubing (from D-181755 Kit).
   **Note:** Two sizes of tubing are supplied. The 0.166 inch (4 mm) I.D. tubing is used with multiple-unit cables and the 0.234 inch (6 mm) I.D. is used with single-unit cables.

2. Pull the white PVC tubing back exposing about 1 inch (25 mm) of coated fibers.
3. Apply B-sealant to exposed fibers.
4. Slide the white PVC tubing back over the fibers until it touches the unit tube.
5. Apply B-sealant to the ends of the white PVC tubing and the unit tube where they butt together for a distance of 1/2-inch (13 mm) on each one.

6. Slide the 2 inch (51 mm) length of tubing over the unit tube about 1 inch (25 mm).
7. Remove any excess B-sealant.
   **Note:** Do not disturb the unit tube until B-sealant has cured.
8. Repeat items 1 through 7 as required.
