1. REASONS FOR APPENDIX

1.01 This appendix is issued:

(a) To make minor corrections and clarify the description.
(b) To revise J58829U.
(c) To add J58829W.

2. CHANGES AND ADDITIONS

On Page 7, Part 2, General

Under Capacity

In 1.03

Change:

...*10 lines may be used for tie trunk terminals (1 line per trunk)...

To Read:

...*10 lines may be used for tie and miscellaneous trunk terminals (1 line per trunk)...

In 1.04

Change: Trunk conductor loop 1500 ohms*

To Read: Trunk conductor loop 1200 ohms*

Under Description

In 1.06, After Last Sentence

Add:

In cases where reserve battery is required, a third module is added to the left, the end panel being transferred to this battery module.

In 1.07, After Last Sentence

Add:

Subsequent calls from other trunks to the busy line will not "camp on" until the first trunk is cut through.

Under Subdivisions of Equipment and Detailed Index

Add:

Circuit Drawing  Equipment Code  Rating of Unit  Title  Equipment Drawing
SD-65747-01  J58829W  AT&TCo Std  Loud Speaker Paging Trunk  J58829W-( )

Printed in U. S. A.  Page 1
On Page 6

Under Part 2, Supplementary Information

Add:

J99219 (AA381.315) - Steel Equipment Cabinets for Housing Miscellaneous Equipments

Under Part 4, Equipment

Under J58829, Notes

In Note C, After Third Sentence

Add:

Also, the dial pulse register must be arranged for 2-digit, ninth level codes.

Change: Note E

To Read:

E. The attendant trunk units are wired for "W" and "Y" options to provide for operation with a cordless attendant position. For unattended operation, the installer should be instructed to replace "W" option straps with "X" option straps on the unit terminal strip.

In Note F

Change: ...dial repeating to trunks...

To Read: ...dial repeating tie trunks...

Under J58829

In List 1

Change:

See Equip Notes

Power Equipment and Cable
J86464B

To Read:

Power Equipment and Cable, J86464B, L1

Under Notes

Change: Note A

To Read:

A. When a battery module is required batteries per J86464B, List 2 shall be ordered separately.

Add:

B. This power plant equipment is supplementary to the power plant "common" equipment furnished on slide 1 of module 1. The battery module equipment is provided with a cable suitable to interconnect it with the power plant equipment in module 1. To minimize voltage drop, the battery module shall be located adjacent to module 1, on its left.

Add:

J8829W (AT&TCo Std) - 756A PBX - Loud Speaker Paging Trunk Unit

Equipment - J58829W-( )

List 1 - Assembly, wiring, and equipment for one loud speaker paging trunk unit per SD-65747-01, apparatus Fig. 1.
